EXPERIENCE

Frontend Developer
DeCellar

📅 07/2022 - Present   📍 ITALY

A startup specializing in NFT for wine sales.

- I successfully led the implementation of bidding and category-like functionality, resulting in increased user engagement and a 7% reduction in page load times. This project involved seamless integration with Firebase, using Firestore to efficiently store and retrieve item details from the cloud, leading to an impressive 20% improvement in data retrieval speed
- I contributed to developing NFT-related frontend solutions in Next.js, incorporating smart contracts for enhanced security and transparency. This initiative facilitated the creation of numerous NFTs and resulted in a 5% growth in user experience satisfaction with NFT features.

Student Mentor
Microverse Inc

📅 09/2022 - 02/2023   📍 USA

Software Development School.

- Assisted 2 junior developers monthly in order to ensure their mastery of web development, agile methodologies, and professional work behavior
- I assisted junior developers with debugging, educating them on coding best practices, and providing them with technical support.
